RE: Letter of Recommendation, Architectural Services

To Whom It May Concern:

Let this letter serve as my highest recommendation of Amundsen & Associates for architectural services. I have had a multi-year professional relationship with Jerry Amundsen and his staff. In my experience, they have been creative, responsive and oriented to bringing the highest degree of service, yet conscious of the owner's budgetary requirements. As is sometimes the case with creatives, awareness of the owner's bottom line may be as elusive as the wind.

I am in the process of completing a major renovation of a 25,000 sq.ft. office building that will be the new location for our real estate company. The interior and exterior design modifications were expertly executed by Amundsen and involved design and construction of an entry tower and porte corchere; atrium and common area improvements; floorplan design and layout for the new office space; reception counter design; and color and finish material selection. This project will cost in excess of \$4.5 million when completed this summer.

Additionally, Amundsen & Associates has assisted with several other office building floor plan designs for tenant buildouts, as well as coordination of contractors and engineers.

I would not hesitate to recommend Amundsen & Associates for any architectural design project.

Respectfully,

A handwritten signature in blue ink, appearing to read "R. S. Hall".
