To Whom It May Concern:

Re: Amundsen Associates

Over the past few years I have entrusted the services of Amundsen Associates to develop tenant drawings and renovation drawings for my professional office building in downtown Casper. Their knowledge of older building construction and their creative design skills have proven invaluable for our building. Modernizing the function of an old building yet maintaining the historical value can be challenging.

As architects, Amundsen Associates met the challenges of our building and developed designs and plans that created up to date space with the grandeur of an historic building.

I would whole heartedly recommend them for any architectural or planning project you might have.

Sincerely,

Ide Land & Leasing Company
